The EconoSine 2 is specifically designed for smaller ( 500 to 2700 watts) emergency lighting applications, and where space is limited. By incorporating the use of new solid state electronics, this compact, economical unit can replace much larger, more expensive inverters.

Superior to other designs on the market, the EconoSine 2 is self-contained with both inverter electronics and batteries in a single cabinet, and has the smallest footprint in the industry. The versatile EconoSine 2 is the ideal power choice to provide the required 90 minute emergency egress lighting for a wide variety of retail and commercial applications.
